

Which started its production in a household kitchen,

Our company, which started its production in a household kitchen and which enhanced its capacity by %100 developing a system of modern technology but keeping the household culture , has since grown in a larger a scale and developed, becoming a food enterprise which bears a corporate identity.

No additives and preservatives are used in the product of Alacati Homemade Cookie. Therefore, our taste and quality have contributed to the faster development of our company by creating trust in our customers in a short time.

As a part of the cookie culture which came out of Thessaloniki and Crete back in 900's and which developed in Istanbul and Izmir, and as a special brand in Turkey pioneering the pastry sector and having adopted the international trends, Alacati Homemade Cookie was established in 2011. The cookies that our family started by making at home in 2011, later came to the stage of being packaged and sold to the markets. After a while, the story which continued with a 70 m2 shop, evolved into a greater extent as a result of the positive feedbacks and increasing demands, making us move on with a production held in our 2000 m2 factory and keep going on with that up until today.

As Alacati Homemade Cookie, we serve in many national markets such as Migros, Carrefour, Macrocenter, A101, Bim File, Sok and many chain markets such as Yeni Cagdas, Ozdilek, Pehlivanoglu, Gurmar, Onur Market, Ozhanlar. As an overseas supply, we export to countries such as Dubai, Qatar, America, Canada, TRNC, Norway and Germany.

The Taste from Your Mother's Hands

**To obtain the taste from mother's hands
we serve with a group of employees who are %95
women.**

Our company holds ISO 9001, ISO 22000 and HACCP certificates. These documents are regularly audited by private companies, food engineers and food technicians and the companies which are our customers. In this way, hygiene and quality are maintained at the highest level.

Alaatı Cookie

Aims proceeding its existence by enlarging each year with new products, new packages, new investments and again with products that will be famous for their high quality.
